Benefits of A Plus Natural Enzymes Cleaner & Pest Eliminator

A Plus Natural Enzymes Cleaner - Step 1

- **Prefomed Enzyme Cleaner**

Cleaner is an environmentally friendly alternative to harsh cleaning chemicals, this all-organic biodegradable cleaner penetrates and emulsifies grease and all types of organic matter on any type of surface not harmed by water such as walls and floors, carpets, rugs and upholstery.

Our unique and highly effective product is specifically designed to clean and break down organic stains such as blood, vomit, urine, waste, food and other such difficult stains. It may also be used on mold and fungus.

Cleaner attacks stains at first application, then continues working to safely emulsify the residual traces of these organic stains. Especially effective on hard-to-clean surfaces such as tile grouting, corners, cracks and crevices where germs colonize, plus carpets and furniture where removal of organic stains is difficult. The unique odor control action includes the absorption of odor molecules on contact, and replacement of offensive odors with a pleasant, refreshing fragrance.

- **Better Than Other Drain Gels on the Market**

Cleaner is a far superior formula to the blue, green, orange & other color gels on the market. This is because the enzymes are yeast based, as opposed to bacteria based.

- **Air Freshener**

Cleaner contains enzymes which are biodegradable and non-toxic. Use diluted as a spray air freshener, or mix with cleaning solutions. Effective on smoke, cooking and waste odors and other undesirable odors.

- **Super Concentrated**

Cleaner is super concentrated for greater value, and is highly effective at 1 oz. per quart.
